

Protection bandwidth

2-fiber bi-directional MS-SP ring

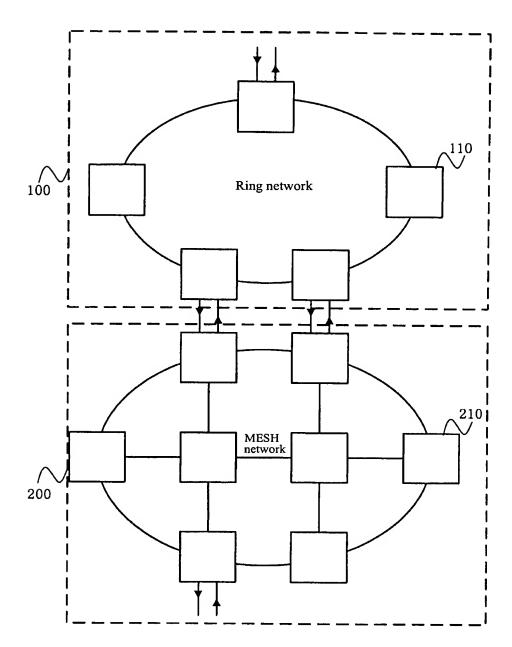

A dual-node service interconnection configuration between a SNCP ring and a MS-SP ring

3/41

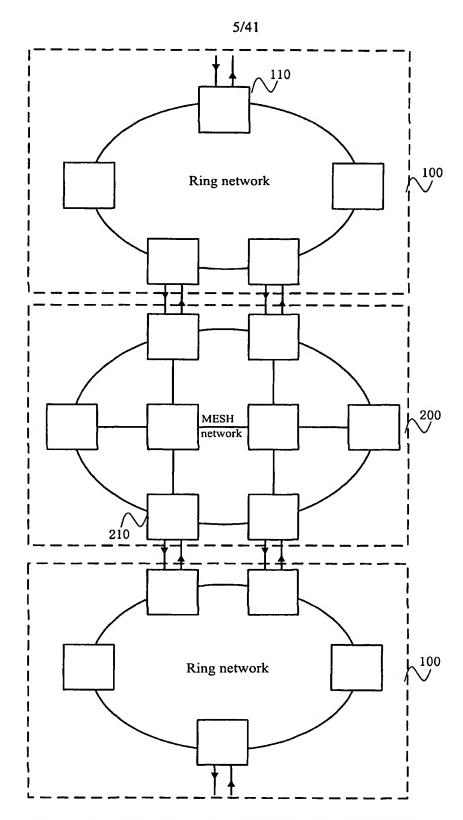

An example of restoration in a mesh network

4/41

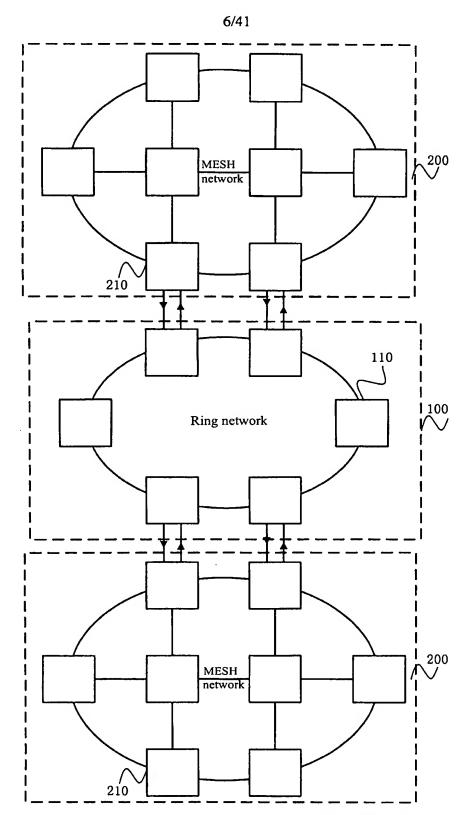

A dual-node interconnection structure between a mesh network and a ring network: Mesh-RING

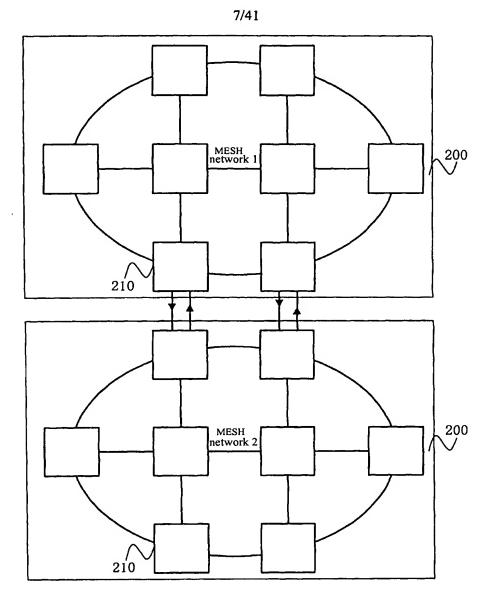

Fig. 4

A dual-node interconnection structure between ring networks and a mesh network: RING-Mesh-RING

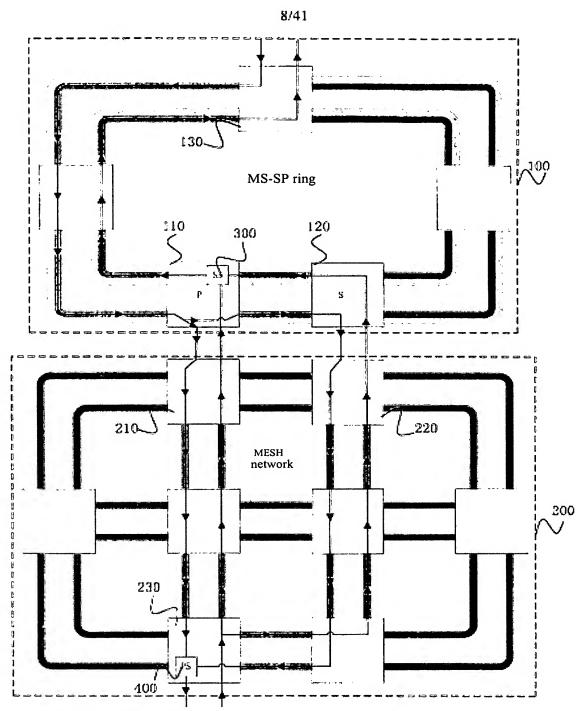

A dual-node interconnection structure between mesh networks and a ring network: Mesh-RING-Mesh

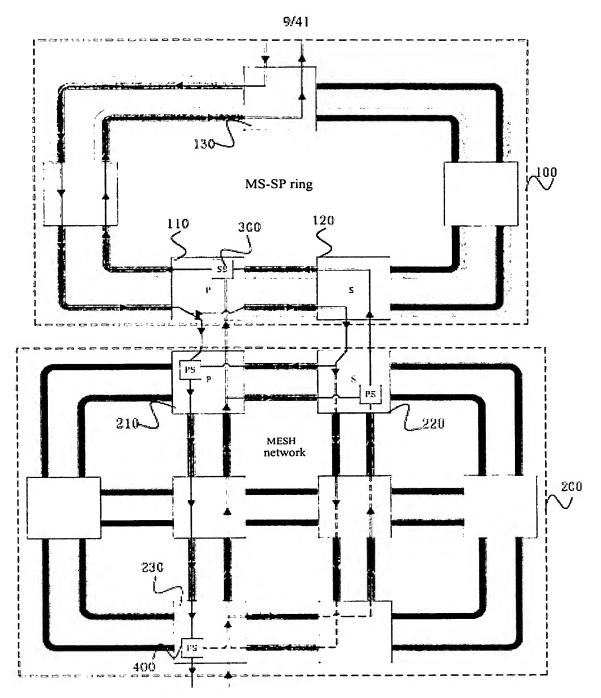

A dual-node interconnection structure between mesh networks: Mesh-Mesl

Fig. 7

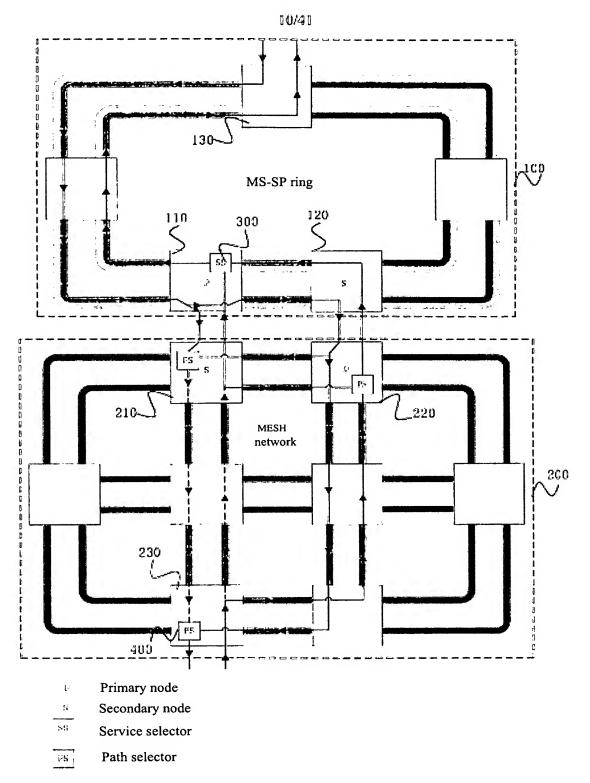

- Primary node
- Secondary node
- Service selector
- Path selector

A dual-node interconnection between a MS-SP ring and a mesh network with SNCP protection

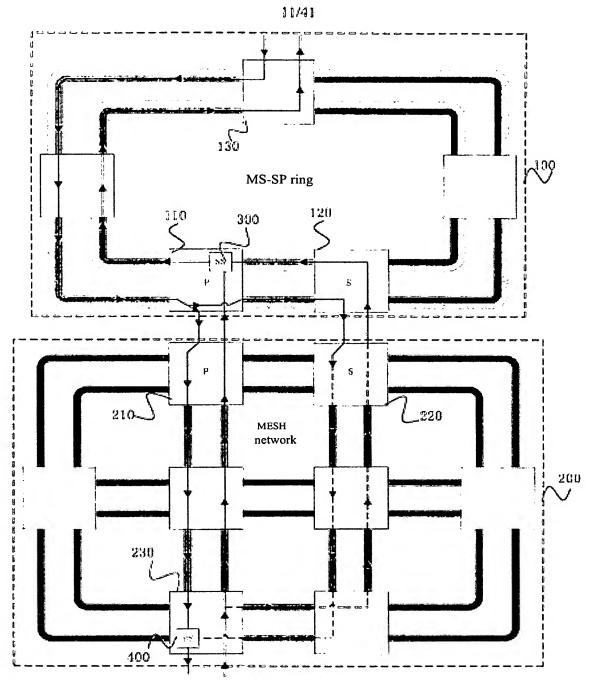

- Primary node
- Secondary node
- Service selector
- Path selector

The first dual-node interconnection scheme between a MS-SP ring and a mesh network with restoration

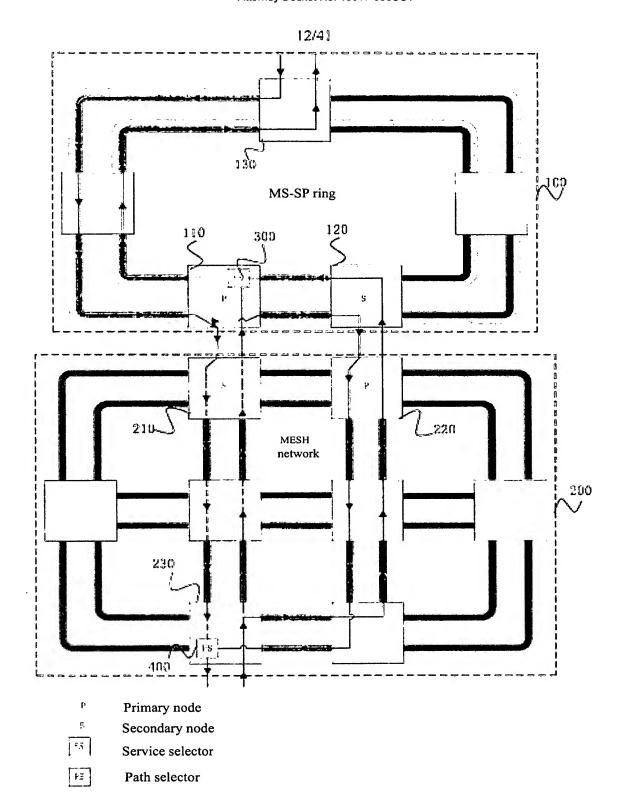

The first dual-node interconnection scheme between a mesh network with restoration and a MS-SP ring (the selection of the primary node in the mesh network is different)

AN EXCHANGE STRUCTURE AND A METHOD OF CONNECTION CONFIGURATION BETWEEN THE OPTICAL NETWORKS Xueqin Wei et al National Phase Application of PCT/CN2003/000735; National Phase Application Filed on February 28, 2006 Attorney Docket No. 18017-006US1

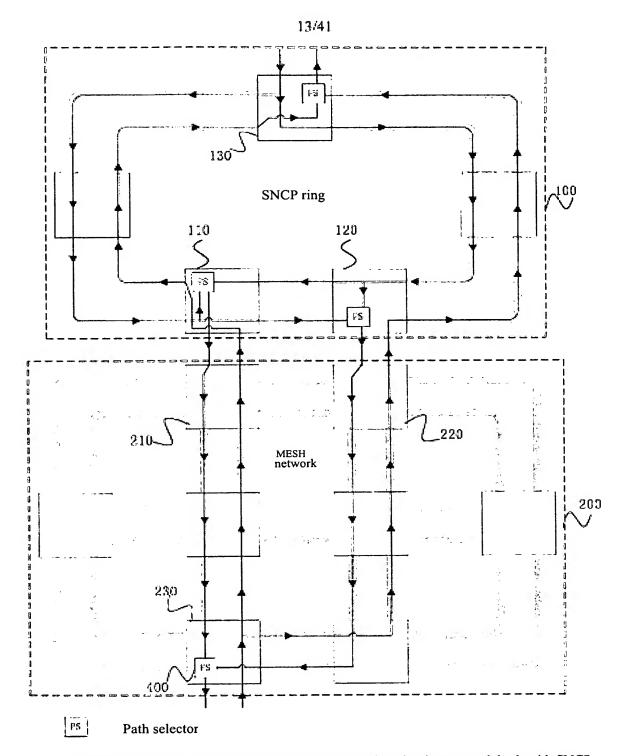

- Primary node
- ç Secondary node
- **35** Service selector
- FS Path selector

The second dual-node interconnection scheme between a mesh network with restoration and a MS-SP ring

The second dual-node interconnection scheme between a mesh network with restoration and a MS-SP ring (the selection of the primary node in the mesh network is different)

AN EXCHANGE STRUCTURE AND A METHOD OF CONNECTION CONFIGURATION BETWEEN THE OPTICAL NETWORKS Xueqin Wei et al National Phase Application of PCT/CN2003/000735; National Phase Application Filed on February 28, 2006 Attorney Docket No. 18017-006US1

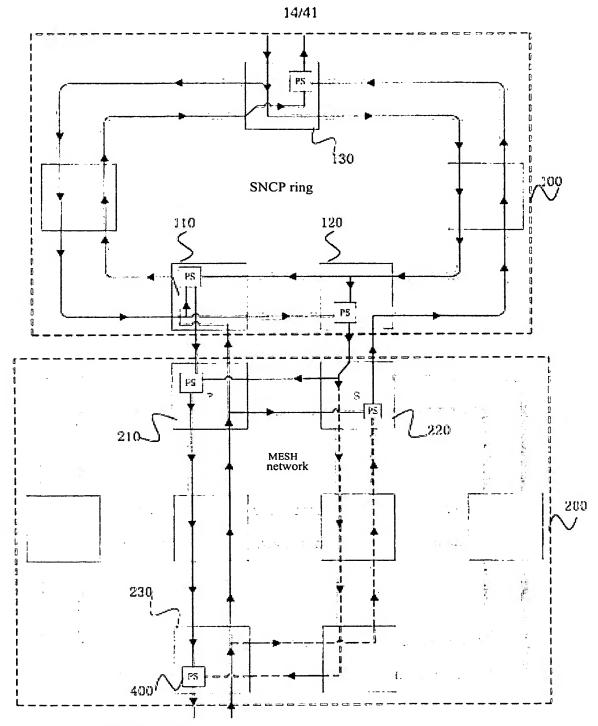

A dual-node interconnection between a mesh network and a ring network both with SNCF

AN EXCHANGE STRUCTURE AND A METHOD OF CONNECTION CONFIGURATION BETWEEN THE OPTICAL NETWORKS Xueqin Wei et al

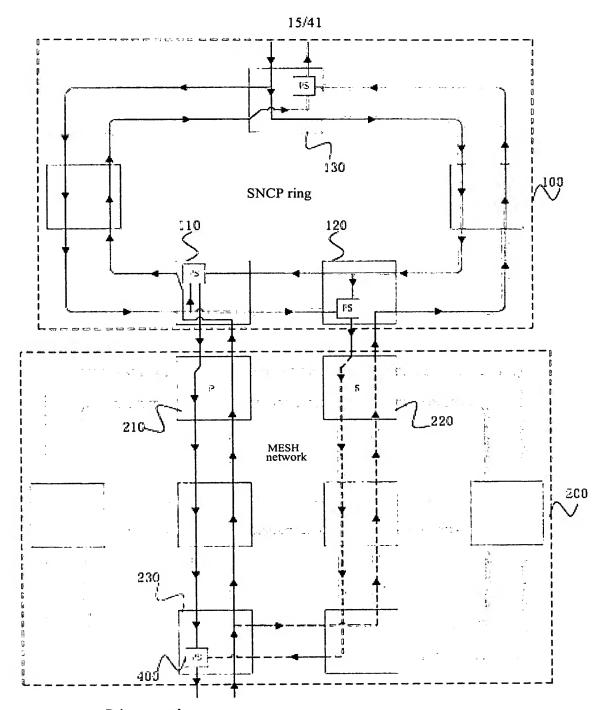

National Phase Application of PCT/CN2003/000735; National Phase Application Filed on February 28, 2006

Attorney Docket No. 18017-006US1

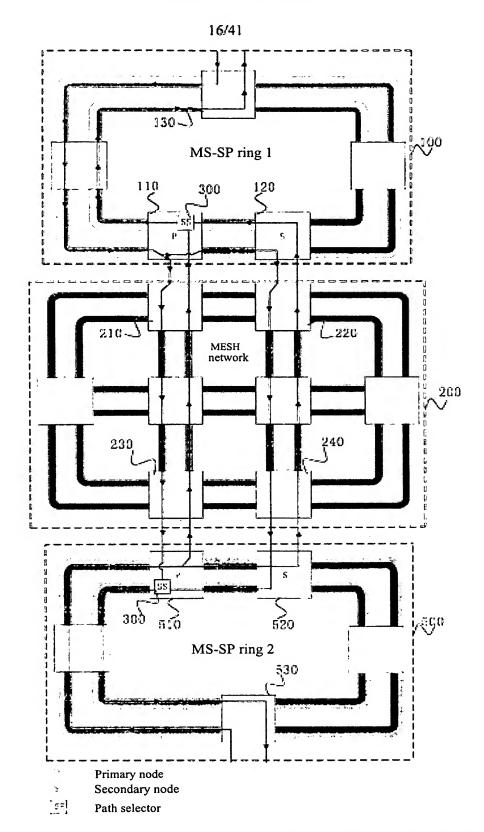

- Primary node P
- Secondary node £
- , P5 Path selector

The first dual-node interconnection scheme between a mesh network with restoration and a SNCP ring

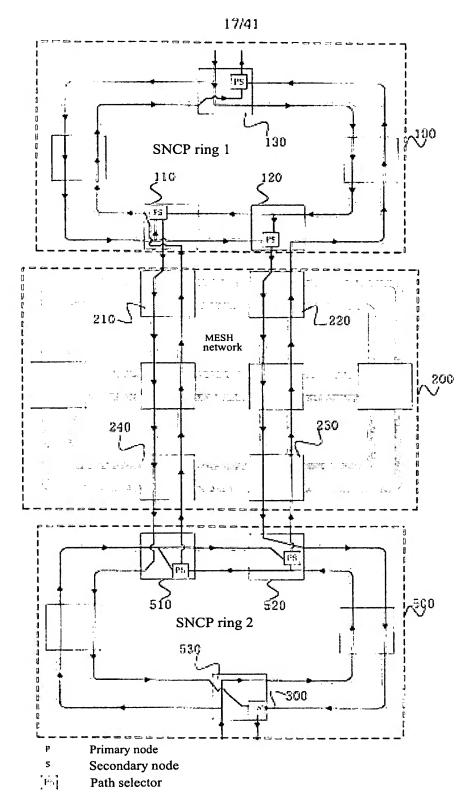

- Primary node ľ
- 5 Secondary node
- FS Path selector

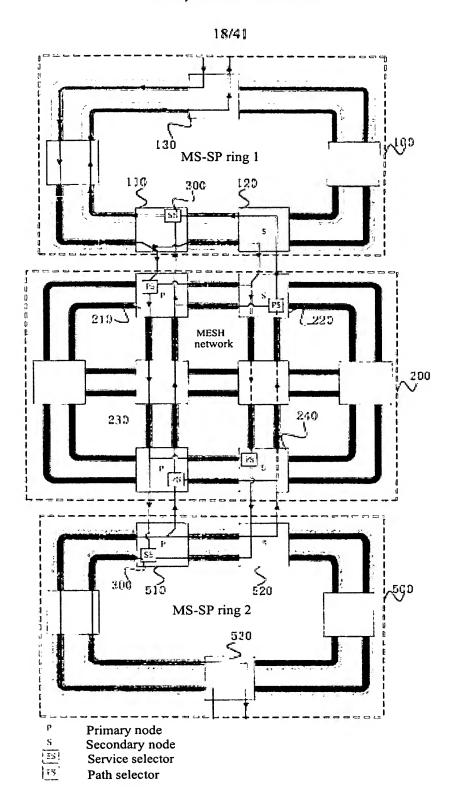

The second dual-node interconnection scheme between a mesh network with restoration and a SNCP ring

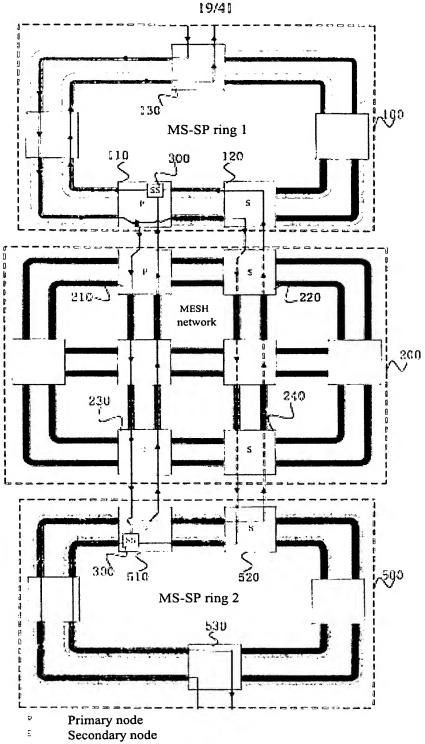

A dual-node interconnection between MS-SP rings and a mesh network without protection in a ring-mesh-ring situation

A dual-node interconnection between SNCP rings and a mesh network without protection in a ring-mesh-ring situation

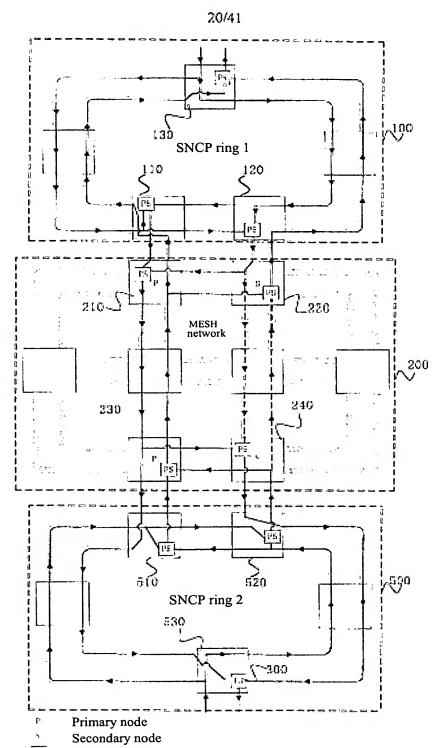

The first dual-node interconnection scheme between MS-SP rings and a mesh network with restoration in a ring-mesh-ring situation

Service selector

The second dual-node interconnection scheme between MS-SP rings and a mesh network with restoration in a ring-mesh-ring situation

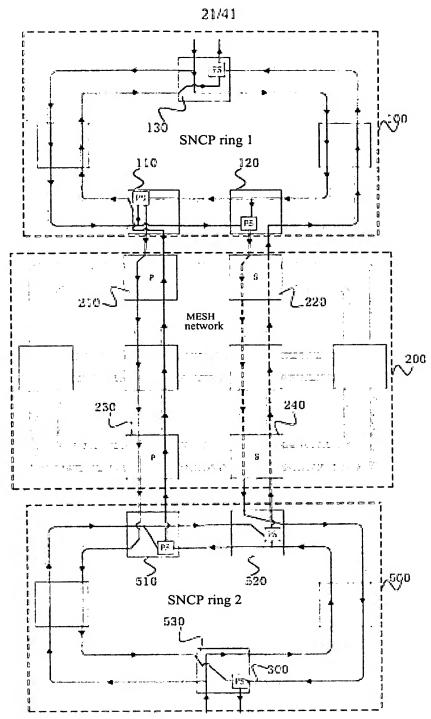

AN EXCHANGE STRUCTURE AND A METHOD OF CONNECTION CONFIGURATION BETWEEN THE OPTICAL NETWORKS Xueqin Wei et al National Phase Application of PCT/CN2003/000735; National Phase Application Filed on February 28, 2006 Attorney Docket No. 18017-006US1

The second dual-node interconnection scheme between SNCP rings and a mesh network with restoration in a ring-mesh-ring situation

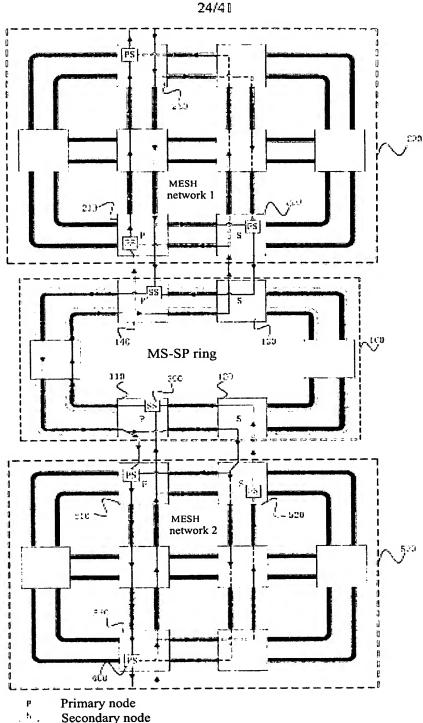

A dual-node interconnection between a MS-SP ring and mesh networks with SNCP in a mesh-ring-mesh situatior AN EXCHANGE STRUCTURE AND A METHOD OF CONNECTION CONFIGURATION BETWEEN THE OPTICAL NETWORKS Xueqin Wei et al National Phase Application of PCT/CN2003/000735; National Phase Application Filed on February 28, 2006 Attorney Docket No. 18017-006US1

23/41

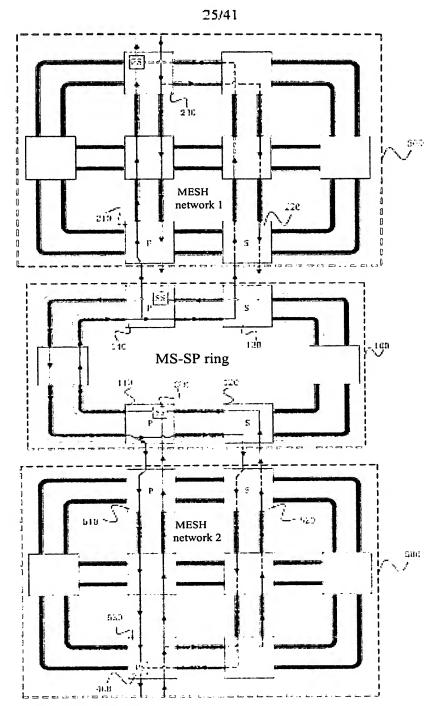

A dual-node interconnection between a SNCP ring and mesh networks with SNCP in a mesh-ring-mesh situation

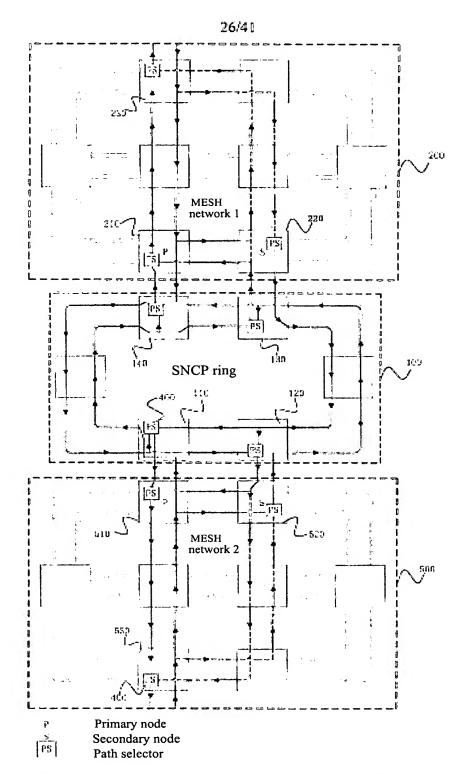

- h ,
- TE. Path selector
- 33 Service selector

The first dual-node interconnection scheme between a MS-SP ring and mesh networks with restoration in a mesh-ring-mesh situation

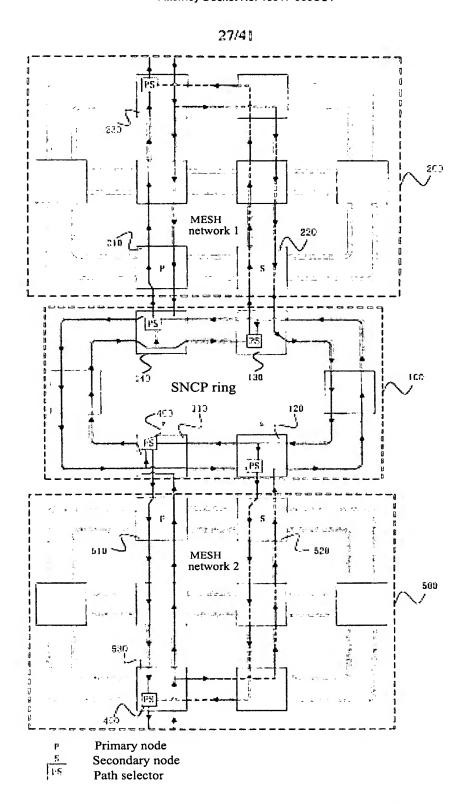

- r Primary node
- 5. Secondary node
- Path selector
- Service selector

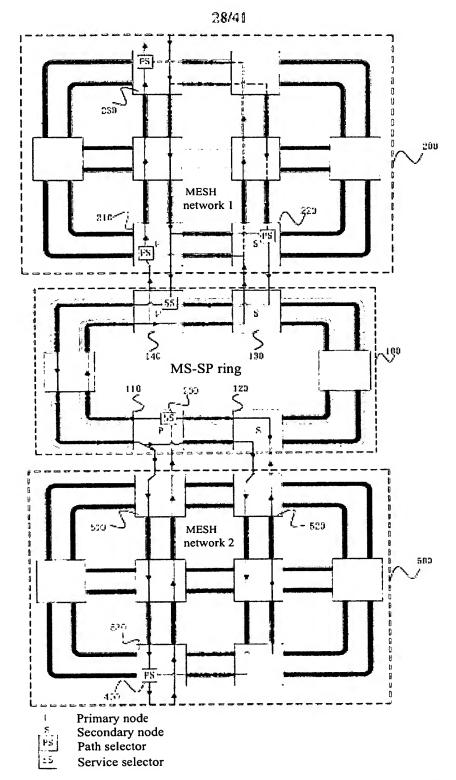

The second dual-node interconnection scheme between a MS-SP ring and mesh networks with restoration in a mesh-ring-mesh situation

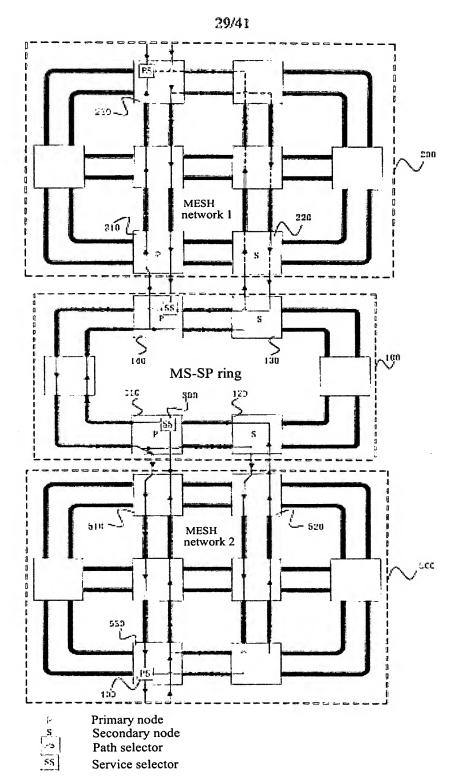

The first dual-node interconnection scheme between a SNCP ring and mesh networks with restoration in a mesh-ring-mesh situation

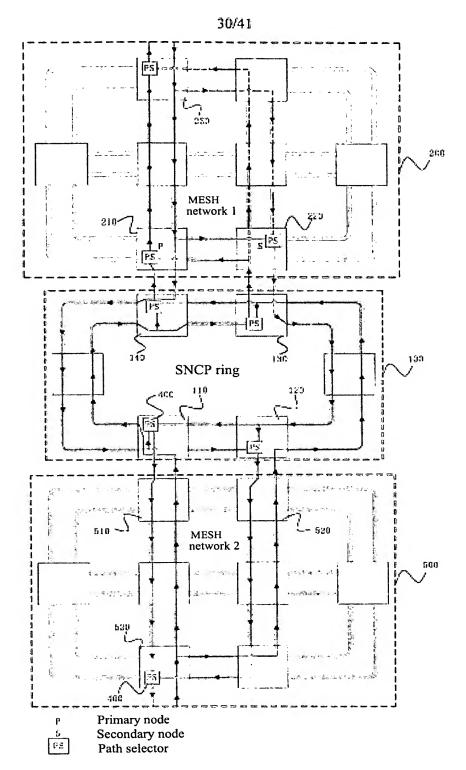

The second dual-node interconnection scheme between a SNCP ring and mesh networks with restoration in a mesh-ring-mesh situation

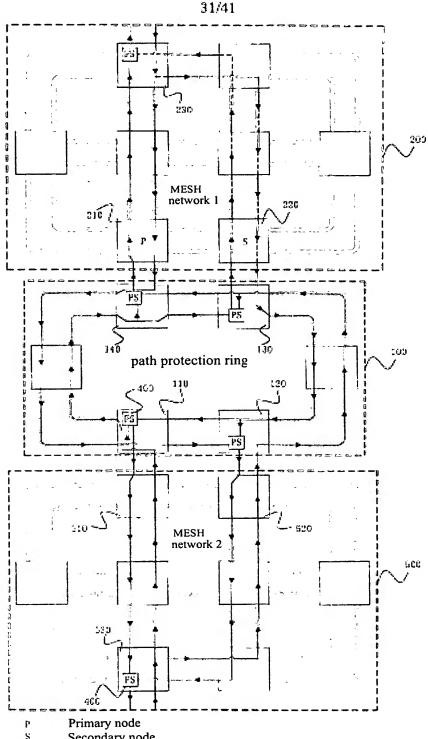

The first dual-node interconnection scheme between a mesh networkwith restoration and a mesh network with SNCP via a MS-SP ring in a mesh-ring-mesh situation

The second dual-node interconnection scheme between a mesh network with restoration and a mesh network with SNCP via a MS-SP ring in a mesh-ring-mesh situation

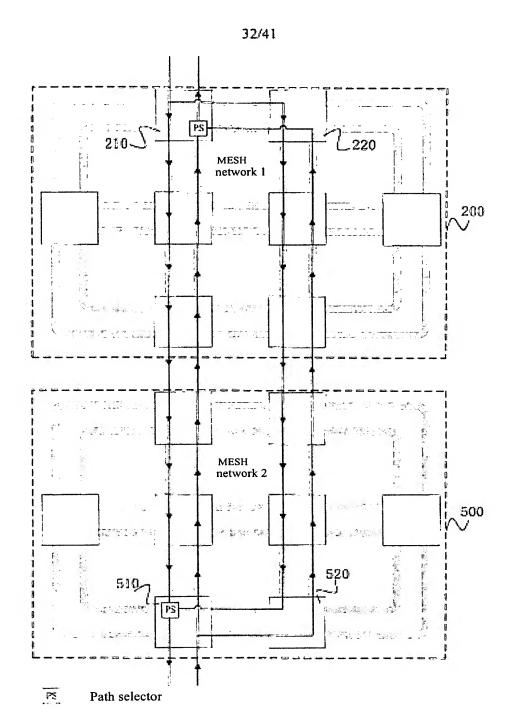

The first dual-node interconnection scheme between a mesh network with restoration and a mesh network with SNCP via a SNCP ring in a mesh-ring-mesh situation

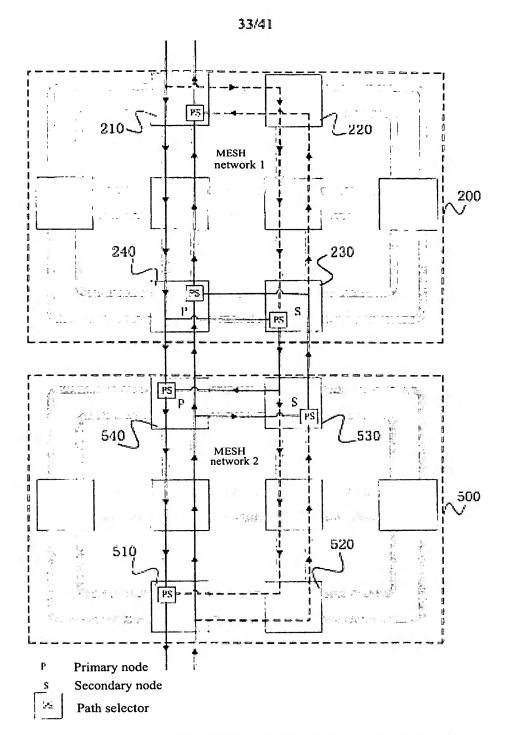

- Secondary node
- FS Path selector

The second dual-node interconnection scheme between a mesh network with restoration and a mesh network with SNCP via a SNCP ring in a mesh-ring-mesh situation

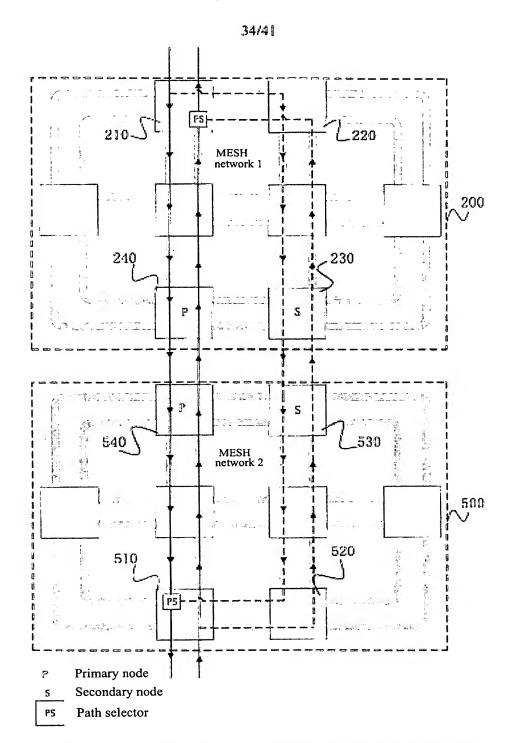

A dual-node interconnection scheme between two mesh networks with SNCP

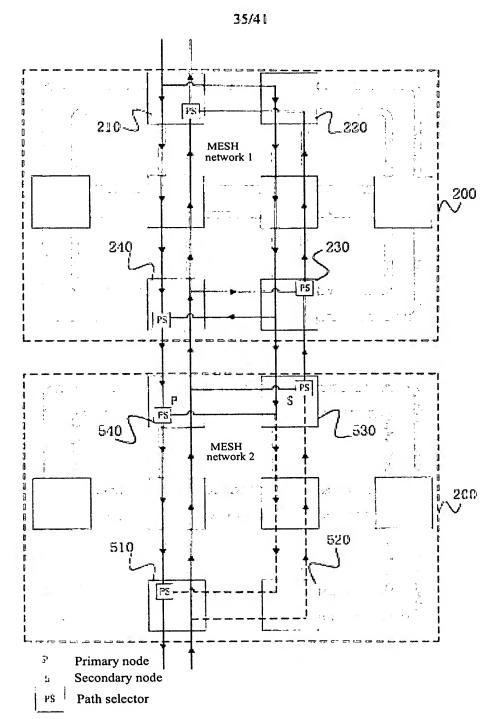

AN EXCHANGE STRUCTURE AND A METHOD OF CONNECTION CONFIGURATION BETWEEN THE OPTICAL NETWORKS Xueqin Wei et al National Phase Application of PCT/CN2003/000735; National Phase Application Filed on February 28, 2006 Attorney Docket No. 18017-006US1

The first dual-node interconnection scheme between two mesh networks with restoration

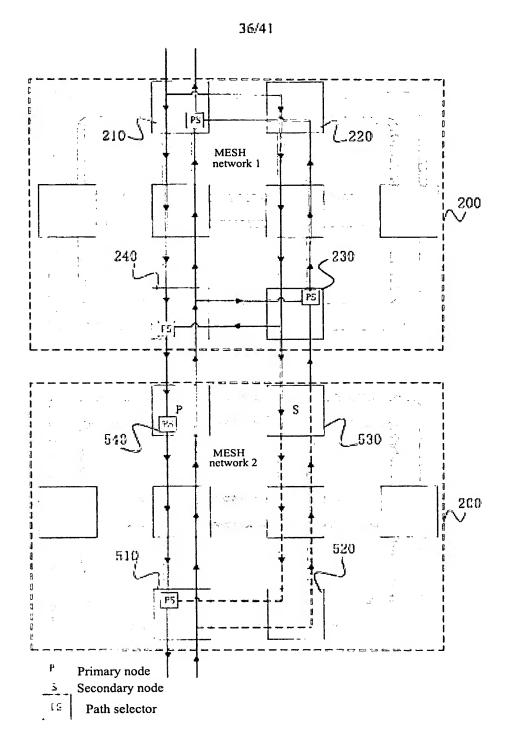

The second dual-node interconnection scheme between two mesh networks with restoration

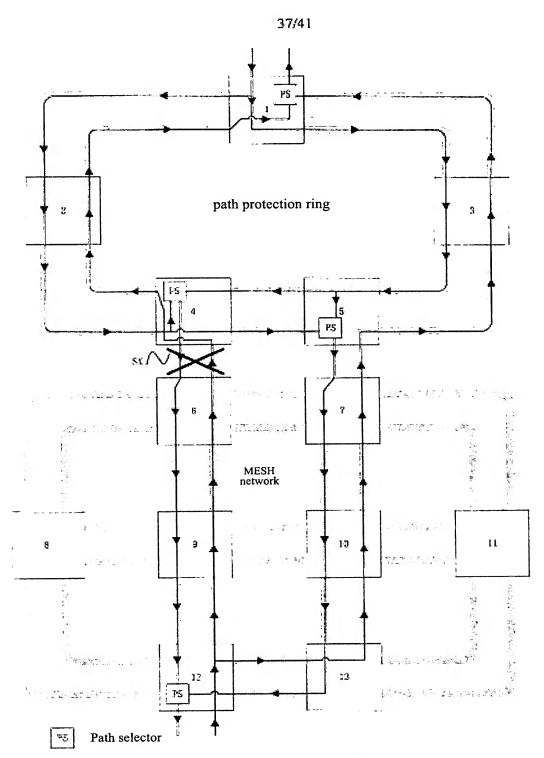

The first dual-node interconnection scheme between a mesh network with SNCP and a mesh network with restoration

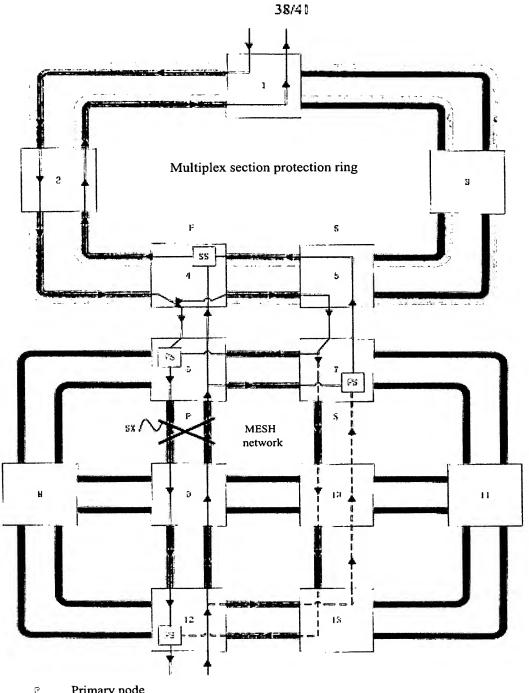

AN EXCHANGE STRUCTURE AND A METHOD OF CONNECTION CONFIGURATION BETWEEN THE OPTICAL NETWORKS Xueqin Wei et al National Phase Application of PCT/CN2003/000735; National Phase Application Filed on February 28, 2006 Attorney Docket No. 18017-006US1

The second dual-node interconnection scheme between a mesh network with SNCP and a mesh network with restoration

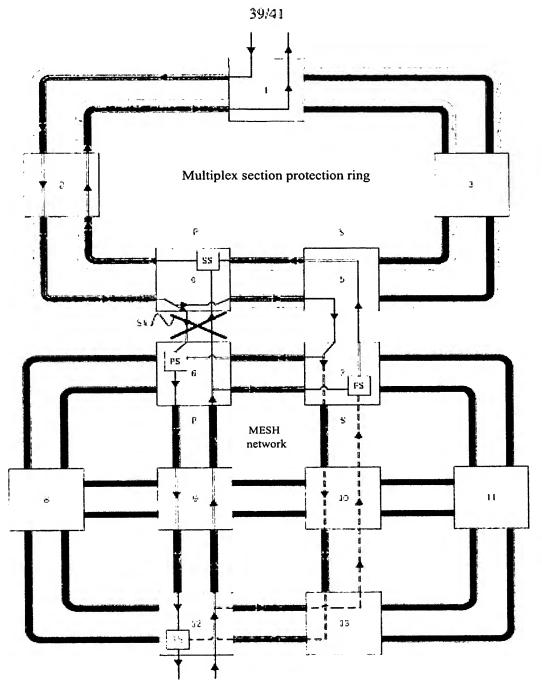

An inter-network link failure occurs when a SNCP ring and a mesh network with SNCP are dual-node interconnected

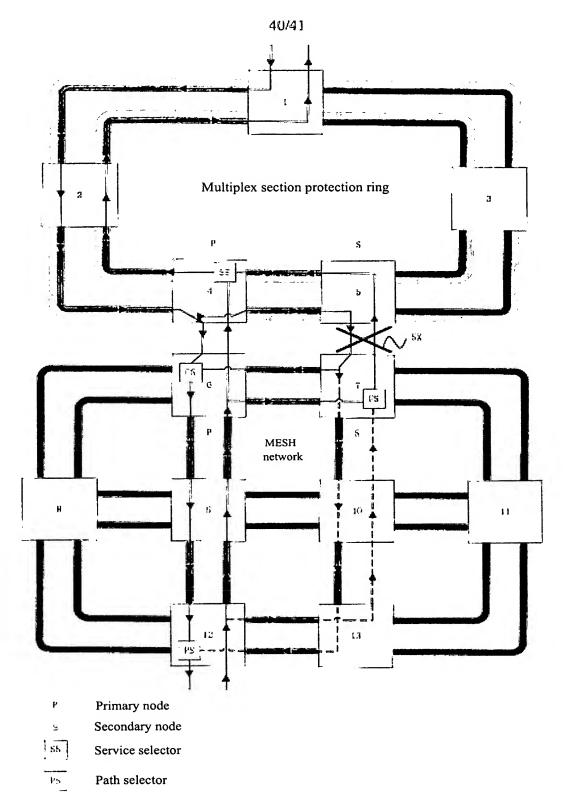

- Primary node
- Secondary node 5
- Service selector 33
- ਜ਼ੜ Path selector

A restoration of a single link failure in a mesh network

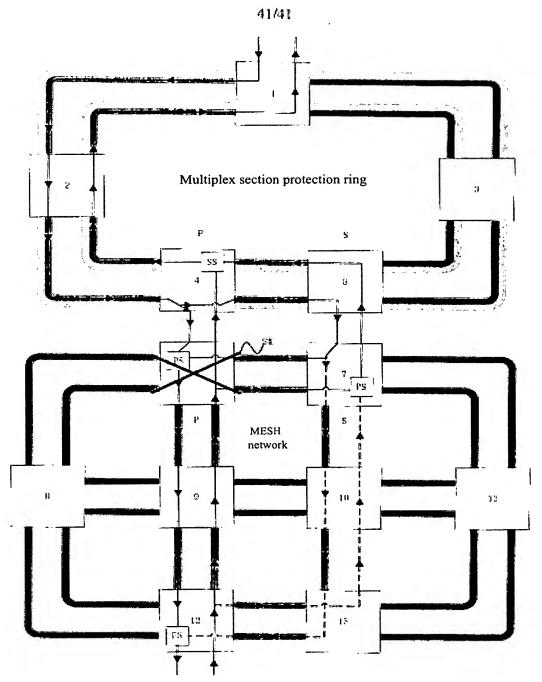

- P Primary node
- Secondary node 5
- 25 Service selector
- F± i Path selector

A protection of a single link failure between networks

A single inter-network link failure that does not lead to protection and restoration

- Primary node P
- Secondary node S
- SS Service selector
- 125 Path selector

a restoration for a node failure
